Student may access each module separately – straight to the module introduction page

If not, if they click the 'Course' page

Homepage also include a page for review and feedback → link to google forms for answering questions/ user feedback

Courses

- 5 Courses
- Upload PDF/ Text as part of the course content
- 3 quizzes per module
- Free certificate for finishing each module
- Search bar is not required

Sample:

Module Titles (to be confirmed)

- (1) International Climate Process
- (2) International Environmental law
- (3) Climate Finance and Climate Risk
- (4) Pollution and Climate Change
- (5) Just Transition

Course introduction page:

- Shows the relevant quizzes and readings for each course with a place to insert an introductory text & relevant modules :

International Environmental Law

第 1 單元 • 8 小時 • 完成

In this module, you'll study global environmental treaties and regulations. You'll learn about the development and application of international laws to protect the environment and promote sustainable development.

What's Included

 15 Videos  10 Readings  4 Assignments  8 Case Studies

[顯示所有單元的學習資源](#) ▾

Course curriculum

As you progress through the modules in this course, you will build a foundation in international climate frameworks, environmental law, sustainable finance, and practical strategies for climate risk management and adaptation.

- **Orientation module:** Welcome to Your Online Campus
- **Module 1:** International Environmental Law
- **Module 2:** International Climate Policy
- **Module 3:** Climate Finance
- **Module 4:** Climate Risk Management
- **Module 5:** Adaptation & Mitigation Strategies

Introduction to International Environmental Law

1 / 1275%

Introduction to International Environmental Law

What is International Environmental Law?

International Environmental Law (IEL) is the body of treaties, agreements, and principles that govern the interaction of nations with the global environment.

IEL aims to address global environmental issues such as climate change, biodiversity loss, and pollution.

Quiz Questions

1. What is the primary goal of International Environmental Law?

- ☐ Promote international trade
- ☐ Address global environmental issues
- ☐ Strengthen national security
- ☐ Encourage tourism

Submit

2. Which of the following is an example of a global environmental treaty?

- ☐ The Kyoto Protocol
- ☐ The North American Free Trade Agreement
- ☐ The European Union Customs Union
- ☐ The Asia Pacific Economic Cooperation

Submit

3. What principle is commonly associated with international environmental law?

Course Completion

Congratulations, you've completed the course!

WWF

Our work Get involved About us

About

Our values

We bear witness to the accelerating decline of nature and our climate, with serious consequences for life on Earth, including our own.

© WWF-US / Clay Bolt

Our mission is to build a future in which people live in harmony with nature. To deliver this mission, we work to conserve and restore biodiversity, the web that supports all life on Earth; to reduce humanity's environmental footprint; and to ensure the sustainable use of natural resources to support current and future generations.

We celebrate and respect diversity in nature and among the people, partners, and communities with whom we work. **Across the many cultures and individuals that represent WWF, we are unified by one mission, one brand, and one common set of values:**

- **Courage:** We demonstrate courage through our actions, we work for change where it's needed, and we inspire people and institutions to tackle the greatest threats to nature and the future of the planet, which is our home.

WWF

Our work Get involved About us

Effects of climate change

Climate change poses a fundamental threat to the places, species and people's livelihoods WWF works to protect.

© Peter Ball, Ryan Hartshorn

Climate change has an impact on turtle nesting sites, it alters sand temperatures, which then affects the sex of hatchlings.

© WWF-US / Steve Morris

Sea levels are rising and oceans are becoming warmer. Longer, more intense droughts threaten crops, wildlife and freshwater supplies. From polar bears in the Arctic to marine turtles off the coast of Africa, our planet's diversity of life is at risk from the changing climate.

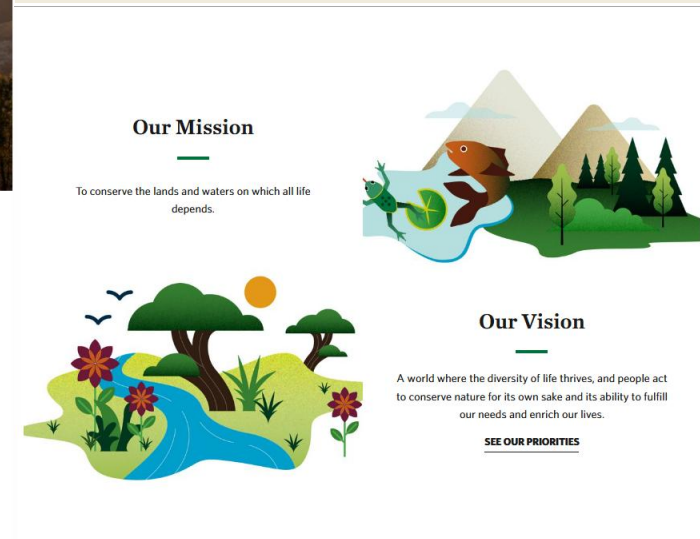

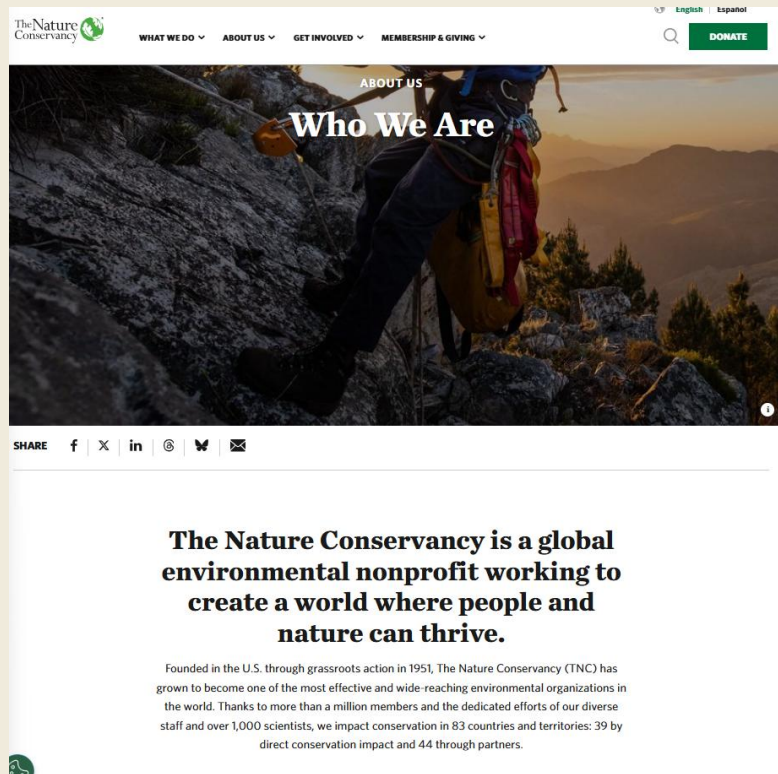

Climate change poses a fundamental threat to the places, species and people's livelihoods WWF works to protect. To adequately address this crisis we must urgently reduce carbon pollution and prepare for the consequences of global warming, which we are already experiencing. WWF works to:

- advance policies to fight climate change
- engage with businesses to reduce carbon emissions
- help people and nature adapt to a changing climate

The screenshot shows the 'Meet the team' section of the Plastic Free Seas website. It features three team members with their photos, names, titles, and biographies. The first member is Dana Winograd, Executive Director & Co-Founder. The second is Mei Yee Lam (Lomme), Education Senior Officer. The third is Sabina, whose name is partially visible. The website has a clean, professional layout with a white background and blue accents.

Meet the team

Dana Winograd
Executive Director & Co-Founder

Dana has lived in HK for almost 30 years and first got involved with environmental issues in 2007 when she was a founding member of DB Green, the local community green group, and drove recycling in Discovery Bay.

Seeing that it would take more than recycling to help solve the problem of plastic marine pollution, Dana co-founded Plastic Free Seas to help promote change in people's use of plastic through education and action. She has delivered hundreds of talks on waste reduction and personal behaviour change to students of all ages, has been invited as a guest speaker by many corporate and community groups and has often been invited to speak on panels and on the radio about the issue of plastic pollution and waste in Hong Kong.

Mei Yee Lam (Lomme)
Education Senior Officer

Lomme taught health education to children and teenage secondary school, teaching Mathematics and Integrated Science.

Having studied the science of nature and initiating green, realised the importance of environmental education for people have to say, positively reinforcing their ideas and change happen.

Sabina

Sabina has lived in Hong Kong for more than 25 years, believes passionately in living a minimal waste life. With her background in the corporate world as well as a

團隊介紹 Team Bio

Chin Chin
Co-founder and Steering Committee

作為一位城市規劃師和環境保護者，我一直希望可以為香港建立更有創意的社區，亦希望為全球的可持續城市發展，協助成立CCRCG時，知道無論政府與系統性改變多重要，但更想落實一點真正解決環境問題影響最大於影響的實質方案。過程確實不容易，但見CCRCG穩健地成長，建立了友好關係，同社區夥伴，而見環境工作對社區的小影響，比對我更多動力繼續堅持下去。As an urban planner and climate activist, I am committed to building community resilience in Hong Kong and promoting sustainable cities globally. When CCRCG began, we knew advocating for systemic changes was crucial, but we also aimed to implement practical solutions to enhance resilience for vulnerable communities affected by the climate crisis. It can be tough at times, but witnessing the growth in CCRCG, the team and community we've built and the positive impact on these communities inspires me and

Blaire
Steering Committee

剛加拿大讀左個氣候變化碩士，發現自己對點樣幫社區做氣候適應工作好有興趣，對氣候公義有興趣，係因為覺得視角正係社會大眾之間解決社會長久不公平，經濟比人問點解會堅持做氣候，大概係因為心入處有氣候改變，做世界氣候適應顧問，譯善問數。After studying for Master of Climate Change in Canada, I realized I'm really interested in help the communities to adapt to climate change. Also, I'm drawn to climate justice because I like the perspective that pushes people to confront and address long-standing social injustices. People often ask me why I insist on continuing this work, and I guess it's because I do believe the world shouldn't be like this. It's okay to be stubborn for the right reasons.

Osbert
Member

「究竟你有咩研究呀？」作為一個城市研究學生，身邊人總會問我咩研究。研究之有關城市研究我都會有少少涉獵，但係我最近研究係點樣可以令我哋城市發展更加公平，而我覺得氣候變化會係一個幾好切入點去這點樣建一個公義城市。
"What do you actually study?" People always ask me when they know I am an urban studies student. I study everything about cities and what I am interested the most is how our cities can develop in an equitable way. I believe climate change could be a good starting point for me to learn more about building a just city.
